TRACING THE ARGENTINE PROCESS TO DEMOCRACY

1. First stage

2. Second stage

3. Third stage

4. Fourth stage

As this model shows the many variables in the Argentine transition are closely linked to one another. For example the economic crisis both gave rise to Las Mujeres Populares protests against the regime and at the same time caused the fruitless attempt of invading the Falklands. Together all of these variables led to the complete de-legitimizing of the military regime and into democratic transition.
