

# 1 Instructions

The files contained in this online appendix are the study protocol for the experiment as well as the log files for the sessions of each participant and their respective raw eyetracking data.

## 1.1 How to use the log files with the GANDER platform

Get the GANDER platform on your system, see <https://gitlab.com/lund-university/gander> , then the log files can be used in replay mode. The files within *participant\_logs* should be placed under *storage-service/app/logs* and the files within *participant\_raw\_eye\_tracking\_data* should be placed in *storage-service/app/bufferLogs*.

For more information regarding set-up and use of the GANDER platform, please refer to the [gitlab page](#).
