Title: Swedish dissertations and their subjects, 1600–1820 : an annotated catalogue / Mattias Kärholm.

Description: Leiden ; Boston : Brill, 2024. | Series: Library of the written word, 1874-4834 ; volume 125 | Includes bibliographical references and indexes. | Contents: Part 1.

Introduction – Early Swedish dissertations – Subjects and topics of Swedish dissertations – Part 2. The catalogue – Introduction to the catalogue – The catalogue – Appendix. Tables of subjects – Bibliography – Index of praeses – Index of respondents – Index of subjects and topics. | Summary: “This book challenges earlier understandings of early modern dissertations as unimaginative academic exercises. It argues for their continuous importance in scholarly and scientific discourse, and describes the richness and diversity of their subjects and themes. The book contains a complete catalogue of the almost 20,000 Swedish dissertations defended in Uppsala, Lund and Åbo, 1600 to 1820. The catalogue includes longer comments and descriptions of a few thousand of these dissertations, and also gives an analysis of how different subjects have evolved over time” – Provided by publisher.

Acknowledgments

This book would not have existed without the help of many people. First, I would like to thank my two editors Andrew Pettegree and Arthur der Weduwen who not only believed in this project, but whose generous advice along the way really helped me to develop it further. It is safe to say that this work would never have found its form or magnitude without you. I would also like to thank a number of book dealers, some who are also good and old friends. Especially, I would like to thank Patrik Andersson, who introduced me to the collecting of dissertations for help and interesting conversations. I would likewise like to thank the very knowledgeable Mats Rehnström for your generosity and for all that you taught me about book history and Swedish dissertations. Other dealers who have been very helpful and important when it comes to developing my interest include Harald Hultqvist, Pierre Dethorey and Mats Persson. I would also like to thank fellow book friends who have tolerated my book talk over the years and/or encouraged me in this project, especially Anders Bergvall, Patrik Wahlberg, Kalle Åström and Torbjörn Lindell. Going back in history, I would also like to thank my parents, Johan and Ann for supporting an interest in literature and books already from an early age. For the financial support that helped to make this publication possible, I would like to thank the following foundations: *Stiftelsen Konung Gustaf VI Adolfs fond för svensk kultur*, and *Åke Wibergs stiftelse*.

Finally, and most of all, I would like to thank my closest family. First of all, my wife Rebecka who has been fundamental for this work. Thank you for bearing with me all these years, and for supporting this project in so many ways. Thank you also to my three sons, Axel for helping me with the quantitative part of the work, Gustav for giving a helping hand with the Åbo dissertations and Ossian for helping me with the Lund dissertations, and to all of you for keeping me company during so many hours of cataloguing dissertations.

Figures and Tables

Figures

- 1 Title page of Johannes Columbus (*praeses*) and Christopher O. Aurivillius' (respondent, enrolled in Gestrike student nation) dissertation on fiction and fables from 1676 7
- 2 Ratio of Swedish dissertation defences per month 1600–1820 (by author) 9
- 3 Number of dissertations per decade (Uppsala, Lund and Åbo University). Åbo dissertations are only counted until 1809 (when Finland became a part of Russia) 9
- 4 Certificate signed by Professor Anders Stobaeus in Lund, 6 June 1782, certifying that Samuel Kihlgrén has been examined both *pro exercitio* and *pro gradu* at the faculty of philosophy in Lund 11
- 5 First Swedish dissertation written in Swedish, with parallel texts in Latin and Swedish (A. Celsius and A. Hellant 1738) 12
- 6 Gratulation verses from Johan Lundersteen and Casten Rönnow's dissertation *De vera origine et natura dominii rerum humani* (1684) 15
- 7 Gratulation verse by Hedwig Sophia Paqualin to her cousin, the respondent Erik Hartwich in Peter Ekerman and Erik Hartwich's *Urbis Romas sub regibus incrementa* (1762) 16
- 8 Different kinds of compilation bindings 18
- 9 Page with illustration from M. E. Gestrinus and E. U. Gavelius *De stellis* from 1635 20
- 10 The mad King Nebudchadnezzar, here depicted as a werewolf (a chapter on werewolves was also inserted into this dissertation). In the back we can also see the Tower of Babel. From J. Palmroot and E. Monthelius' *De metamorphosi Nebudcadnezaris in bestiam*, 1703 21
- 11 Illustration of a threshing-machine from S. Duræus' and G. Tiselius' *Novam machinam segetibus trituranis idoneam sistens*, 1773 22
- 12 Illustration of a 'sleigh-beaver' from L. Norrmannus and J. Biurberg's *Castor breviter delineates*, 1687. Marks found on the back of some beavers had led to the (false) belief that some beavers were used by other beavers as sleighs to transport wood 23
- 13 Illustrations from L. Roberg and J. G. Geringius' *De piscibus*, 1727. The illustration to the right depicts fish scales as seen through a microscope 23
- 14 The reproduction of older, medieval illustrations can be seen in a series of different dissertations presided by D. Solander. Here we can see an illustration from Solander's and Krook *De praescriptione* from 1745. The illustration is copied from Magnus the IV of Sweden's City Law of the 14th century 24
- 15 The dissertation bibliographer Gabriel Marklin's book owner stamp. Not too rare, but always nice to find if one collects Swedish dissertations 26
- 16 Lidén's bibliography is still as an important reference work and used by book dealers. This is a page from the famous Swedish firm Björck and Börjesson's copy (later also belonging to Björn Löwendahl), showing signs of good use 28
- 17 Cederhamn's bibliography from 1765 is arranged according to titles, and thus gives a first rudimentary idea of the distribution between different topics 30
- 18 Johan Jakob Döbelius and Nils Retzius' dissertation on vampires from 1727 34
- 19 Total number of Swedish dissertations (Åbo, Lund and Uppsala) per decade, in relation to the number of dissertations in the collection per decade (number of dissertations are shown by staples and measured on the left axis) 36
- 20 The distribution of dissertations in relation to university and subject (%), 1600 to 1820 (19,273 dissertations) 37
