

Industrial Management Models with Emphasis on Construction Waste

Jan Stenis

Department of Construction and Architecture, Lund Institute of Technology, Lund University
Department of Technology, University of Kalmar

ERRATA

- 1.** Revised text in Chapter 1, page 21, line four from the top of the page:
It is stated: “A nomenclature is followed, finally...” *This should instead be:* “A nomenclature ends this chapter.”
- 2.** Added text in Chapter 1.9.2, at the end of page 33:
The environmental adjustment costs – all costs connected with making the production processes of a company environmentally friendly.
Environmental impact weights – weights for adjustment of the costs connected with a particular type of waste to its environmental impact as based on scientific evidence and/or as viewed in terms of overall societal aims.
- 3.** Revised text in Chapter 2, page 35, line five from the top of the page:
It is stated: “The presentation is divided into two major parts.”
This should instead be: “The presentation is divided into three major parts.”
- 4.** Revised text in Chapter 4.1.5.2, page 77, line twelve from the end of the page and in Appendix 7: page 201, line eleven from the end of the page; page 202, line four from the top of the page and line eleven from the end of the page; page 203, line five from the top of the page:
It is stated: “Table 3.10” *This should instead be:* “Paper VI, Table 4”.
- 5.** Revised text in “Appendices”, page 97, line three from the end of the page:
It is stated: “**Management Models.** Waste Management & Research...”
This should instead be: “**Management Models: A Swedish Case Study.** Waste Management & Research...”
