To Fold or To Fibrillate?

Serendipity in Stability Studies

Doctoral Thesis

Olga Szczepankiewicz
Lund, Sweden, 2011

LUND
UNIVERSITY

Department of Biophysical Chemistry

Akademisk avhandling för avläggande av teknisk doktorsexamen vid teknisk fakultet vid Lunds Universitet, att offentligt försvaras i hörsal B, Kemicentrum, fredagen den 28 oktober, kl 13.00. Fakultetsopponent är professor Daniel Otzen, University of Aarhus.

Front cover: Sixten Westman, 4 years, “To Fold or To Fibrillate?”
On the front you can see four folded proteins in yellow. A fibril in orange is presented on the back of the cover.

Supervisor: Professor Sara Snogerup Linse

Examination Committee: Assistant Professor Eva Nordberg
Lund University

Professor Mats Hansson
Carlsberg Laboratory, Copenhagen

Professor Per Hammarström
Linköping University

“Any knowledge that doesn't lead to new questions quickly dies out: it fails to maintain the temperature required for sustaining life.”

Wisława Szymborska
Nobel Laureate 1996

Dokumentblad

Contents

Preface	1
Populärvetenskaplig sammanfattning	2
List of papers and the author's contribution to the papers	5
Additional publications not included in the thesis	6
Abbreviations	7
Acknowledgement	8
Part one: Background to proteins	
Introduction to proteins	11
Thermodynamics for reactions	11
Intermolecular interactions	13
van der Waals interactions	13
Coulombic interactions	13
Hydrogen bonds	14
Hydrophobic effect	14
Intramolecular interactions in proteins	16
Protein folding and stability	18
Protein denaturation	20
Thermal denaturation	21
Chemical denaturation	22
Protein binding and assembly	23

Protein reconstitution	24
Protein aggregation	25
To fold or to fibrillate?	26
Stabilization of proteins	27
Phage display and fragment complementation	28
Split GFP and fragment complementation	29
Part two: Experimental systems	
Monellin	29
Amyloid beta peptide	30
B1 domain of protein G	32
Green fluorescence protein	32
Part three: Methods	
Optical spectroscopy	33
Absorbance spectroscopy	33
Circular dichroism spectroscopy	34
Fluorescence spectroscopy	35
Thioflavin T fluorescence assay – fibrillation kinetics	36
Part four: Introduction to papers	37
Part five: To fold or to fibrillate? Conclusions	53
Part six: References	55
Part seven: Papers
